More than just waste disposal.

Your full-service partner for sustainable
construction site disposal and organisation

Perfectly organised, well cared for and sustainably disposed of!

If you are planning a new build or conversion for individual premises, shops or entire buildings, then we are your partner. With our full service, we take care of everything that is necessary to set up, organise and keep a construction site running in accordance with the law. Of course, we also organise the dismantling of

the construction site so that nothing stands in the way of a glamorous (re)opening.

Reduce your workload for the construction project with us and save time and money! You can concentrate on your core business, we'll take care of the rest.

Well cared for all round.

Our complete service from A to Z.

- Administrative procedures: applications and permits (e.g. permission to erect barriers, scaffolding and containers in public traffic areas)
- Construction site equipment: traffic area planning/safety and signposting, barriers
- Provision of construction site equipment (mobile toilets, site fence, ...)
- Organisation of qualified personnel (e.g. carpenters, drywall builders or electricians)
- Professional waste separation and disposal of all types of construction site waste
- Commissioning and organisation the waste disposal companies for the respective construction sites
- Ongoing support and scheduling of construction site waste disposal (e.g. skip and container replacement)
- Documentation of the construction site disposal carried out
- Disposal of the resulting materials
Materials with LEED certification*, recycling rate >100% possible

* LEED (Leadership in Energy and Environmental Design) is the most widely used certification procedure in the international property industry. The system was developed for the requirements of different construction tasks and differentiated to promote sustainability in the construction industry.
