

Waste disposal services

available from

rica Service GmbH

Hude

Philosophy

At the beginning is the concept: together with our customer we develop an individual, innovative disposal logistic, having first established the need, storage capacity, collection and disposal rhythm for the exact location. The efforts you go to internally, and the expense you incur, will show the results.

Nowadays, packaging waste is no longer simply taken to a landfill site, but is processed in multiple stages of expensive recycling procedures to become valuable secondary raw materials that, with our help, can be preserved as valuable resources.

We dispose of residual waste in an environmentally compatible, lawful manner. We pay special attention to the careful, reliable disposal of waste. For these reasons we are certified as disposal specialists under the German Waste Management Act – KrWG and other regarding regulations.

For many customers, and for ourselves, the disposal service signifies perfect timing: we collect your waste from the location where you hold it, on the dates and at the times specified by you: whether before your location opens, after closing hours, at the weekend...

When it suits you!

We look after all our customers personally, and create a long-term confidential relationship with rica Service GmbH. To ensure that this is maintained we have initiated quality management conforming to DIN EN ISO 9001:2008 and act accordingly.

Disposal of packaging

Over the past few years, the use of packaging materials such as paperboard or cardboard has increased steadily. Experts anticipate that the quantity of transport, removal and sales packages will continue to rise in the coming years. Packaging waste consists of important raw materials that must be retained in the business cycle!

Abfalltrennung

Kartonage/Pappe

- Große Kartons
zusammenfalten und im Rolli stapeln
- Kleine leere Kartons oder Kartons mit Inhalt
(Seidenpapier, kleine Pappen) in die Presse
legen und abpressen
- Seidenpapier
z.B. aus verpackten Blusen, Hemden, in leerem
Karton sammeln, Karton verschließen in die
Presse legen bzw. im Rolli stapeln
- Kleine Pappen
z.B. aus verpackten Blusen, Hemden, Strümpfen
in leerem Karton sammeln, Karton verschließen
in die Presse legen bzw. im Rolli stapeln

0172 1809440

Abfalltrennung

Transparente Folie

- in transparenten Säcken sammeln, Säcke fest

rica Service GmbH is already there where waste is incurred, to help record and correctly sort it.

Mobile disposal systems

Rubbish bags / Waste trolleys / Cage carts / Large containers (– 2/4 wheels) from 60 l – 1,100 l

...take your choice!

Stationary disposal systems

Bale presses for paperboard and plastic bales weighing 35 – 80 kg each

By the way:

The use of a bale press means a saving in CO² of up to 3.2 kg CO² per run with a modern van (Euro 6 norm) with a load capacity of 15 cbm!

Dismantling, shop conversion, return to previous construction, disposal

Are you converting, or building new?

A special service that we offer for such measures begins with presenting qualified personnel (e.g. joiner, dry construction engineer, electrician) and ends with the competent sorting of waste on site and the disposal of all kinds of building site waste. We organize all the required permits, e.g. in pedestrian zones, the appropriate choice of containers, and we charge only for the services we have performed and disposal we have carried out.

Let's shake hands on it!

House clearance, break up of a household or office

EVERYTHING MUST GO!

We'll take care of it:

- Professional break up of a household or partial house clearance e.g. following a court order concerning the administration of an estate,
- Clearance of basements, attics, garages, stores, barns etc.
- Break up of offices, factories, practices and businesses
- Disposal of electric and electronic scrap

Our motor fleet

From light truck to Sprinter-type van to a truck with box superstructure and hydraulic platform – we are on the road for you with the right vehicle concept.

If required, our logistics partners have vehicles that set up, exchange and remove skips or roll-off containers at your desired location.

rica's waste disposal vehicles are marked in accordance with all legal obligations. e.g. DIN 30710

We are of course certified disposal specialists :

Technical control certificate*

Certified activities per §56 KrWG :

„Deal - mediate– collect – transport“

Technical control certificate: no. ZUUM-185-1210-22-18-0116 with effect until 16.08.2019
